# Cambridge Secondary 1 Progression Test <br> Question paper 

## Mathematics Paper 1

## Stage 7

Name $\qquad$

Additional materials:
Ruler
Tracing paper
Calculators are not allowed.

## READ THESE INSTRUCTIONS FIRST

Answer all questions in the spaces provided on the question paper.
You should show all your working on the question paper.
The number of marks is given in brackets [ ] at the end of each question or part question.

The total number of marks for this paper is 45 .

1 The temperature in Stockholm at 0600 is $-3^{\circ} \mathrm{C}$. At 1200 the temperature has risen by $5^{\circ} \mathrm{C}$.

What is the temperature at 1200 ?

2 Calculate.
(a) $15^{2}$
(b) $\sqrt{81}$

3 Write the missing numbers.
(a) $17.26 \times 1000=$
(b) $3.8 \div \ldots . . . . . . . . . . . . . . . .=0.038$

4 Kieran picks a bead out of a bag without looking.
He records the colour and replaces the bead.
Kieran does this 50 times.
He picks out a red bead 15 times.
Estimate the probability of picking a red bead.

5 (a) Write $\frac{27}{4}$ as a mixed number.
(b) Write $3 \frac{4}{5}$ as an improper fraction.

6 A book costs $\$ 15$ in a shop.
If it is bought on the internet, it costs $80 \%$ of this amount.
How much does the book cost if it is bought on the internet?

7 Look at the shape drawn on the grid.
Reflect this shape in the line $y=x$.

8 Look at the diagram.

Work out the value of $a$.

- [1]

9 Calculate $34.2 \div 6$

10 (a) ABCD is a parallelogram.

NOT TO
SCALE

Calculate the value of $x$.
(b) Karl measures the four angles of a quadrilateral as:

$$
130^{\circ} \quad 65^{\circ} \quad 120^{\circ} \quad 55^{\circ}
$$

Fay says he has made a mistake in measuring the angles.
Is Fay correct? Yes/No

Explain how you know.
Because $\qquad$

11 The table shows the highest daily temperatures in London and in Sydney during a week in March.

|  | Mon | Tues | Wed | Thurs | Fri | Sat | Sun |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| London | $6^{\circ} \mathrm{C}$ | $9^{\circ} \mathrm{C}$ | $8^{\circ} \mathrm{C}$ | $10^{\circ} \mathrm{C}$ | $11^{\circ} \mathrm{C}$ | $10^{\circ} \mathrm{C}$ | $9^{\circ} \mathrm{C}$ |
| Sydney | $20^{\circ} \mathrm{C}$ | $22^{\circ} \mathrm{C}$ | $23^{\circ} \mathrm{C}$ | $19^{\circ} \mathrm{C}$ | $20^{\circ} \mathrm{C}$ | $21^{\circ} \mathrm{C}$ | $24^{\circ} \mathrm{C}$ |

(a) What is the range of the temperatures in London?
$\qquad$
(b) What is the median temperature in Sydney?
$\qquad$
(c) Make two comments comparing the temperatures in London and Sydney during this week.
$\qquad$
$\qquad$

12 Write brackets in the calculation to make it correct.

$$
18+7 \div 3+2=5
$$

13 A furniture manufacturer needs 12 screws when making a table.
(a) Put a ring round the formula that gives the total number of screws $(y)$ needed to make $x$ tables.

$$
y=12+x \quad y=12 \div x \quad y=12 x \quad y=12-x
$$

(b) Use the formula to calculate the number of screws needed for 20 tables.

14 The table shows some information about triangles $\mathrm{A}, \mathrm{B}, \mathrm{C}$ and D .

|  |  | Type of Triangle |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Triangle | Angles | Scalene | Right angled | Isosceles |
| A | $90^{\circ}, 30^{\circ}, 60^{\circ}$ | $\checkmark$ | $\checkmark$ | $x$ |
| B | $50^{\circ}, 80^{\circ}, 50^{\circ}$ |  |  |  |
| C | $45^{\circ}, 90^{\circ}, 45^{\circ}$ |  |  |  |
| D | $40^{\circ}, 60^{\circ}, 80^{\circ}$ |  |  |  |

Complete the table using ticks $(\checkmark)$ and crosses $(\mathbf{x})$.
The first row has been done for you.

15 Ali has some sweets.
He gives $\frac{1}{8}$ of them to Suzi and $\frac{1}{4}$ of them to Tom.
What fraction of the sweets does Ali have left?
Show your working.

16 The table shows some information about 3D shapes.
Complete the table.

| Name of <br> shape | Number of <br> faces | Number of <br> vertices | Number of <br> edges |
| :---: | :---: | :---: | :---: |
| Square based <br> pyramid | 5 | 5 |  |
|  | 6 | 8 | 12 |
| Triangular <br> prism | 5 |  | 9 |

17 Draw lines to join the calculations that have the same answer. One has been done for you.

18 Look at the shapes A and B.

NOT TO
SCALE

A is a square.
$B$ is a rectangle.
$A$ and $B$ have the same perimeter.
Work out the length of $a$ ?
Show your working.

19 A theatre has seats arranged in rows of 24 382 people attend a show at the theatre.

What is the smallest number of rows that is needed to seat these people? Show your working.
rows

20 Write the ratio 42 : 24 in its simplest form.
$\qquad$ :

21 Put a ring round all the fractions that are equivalent to $\frac{3}{5}$
$\frac{16}{30} \quad \frac{12}{20} \quad \frac{14}{25} \quad \frac{28}{35} \quad \frac{9}{15}$

22 Lucy buys a scarf for $\$ 7.48$ and a skirt for $\$ 24.65$
How much change does she get from a $\$ 50$ note?
Show your working.

$$
\$
$$

23 Farhan asks all the students in his class how they travel to school. He shows his results in a pie chart and on a bar chart.

(a) Complete the bar chart.
(b) How many students are there in Farhan's class?

24 A fruit drink is made by mixing juice and water in the ratio $2: 9$
(a) How many litres of water are mixed with 6 litres of juice?
$\qquad$ litres
(b) How many litres of juice are needed to make 44 litres of the drink?

25 Look at the diagram.

$A B D$ is a right-angled triangle.
$A C D$ is an isosceles triangle with $A C=C D$.
Angle $A C D=110^{\circ}$
Work out angle $A B D$.

26 Look at rectangles A and B.

Shade some squares in rectangle A so that the percentage of shaded squares is the same in both rectangles.

27 The table shows the attendances at four soccer matches.

| Match | Attendance |
| :---: | :---: |
| A | 5472 |
| B | 4094 |
| C | 6149 |
| D | 4765 |

Harry says that if the attendance figures are rounded to the nearest 1000 , two matches have the same attendance.

Is Harry correct? Yes/No
Explain your answer.
Because $\qquad$
